

Innovit Multi-Domain MDM

TECHNICAL DATA SHEET

Innovit MDM helps organizations to aggregate, manage and validate all types of master data including product, customer, vendor and location in a single application and syndicate them to all their critical business processes. Out-of-the-box features enable best practices in master data management for data consolidation, data quality, data enrichment, data governance and data synchronization. With Innovit MDM as a foundation for reliable master data, organizations can increase business process efficiency, minimize operational risk and streamline trading partner collaboration.

Innovit MDM is a multi-user software application developed using standards-based Java and EJB (Enterprise Java Bean) technology. The architecture is designed for distributed processing that allows master data to be managed and exchanged collaboratively, across both intranet environments and the Internet

COMPATIBILITY AND SYSTEM REQUIREMENTS

Innovit MDM (v5.9.2) application offers platform independence across all major database, operating system, web & application server, and browser platforms.

Operating System	Any operating system that supports Java including: Windows (Vista, 7, 8.1, 10), Windows Server (2008R2 - 2012R2) - Server systems must be 64-bit Windows, RHEL Linux 5 or later (or equivalent), Solaris 10 or later.
Database Management System (DBMS)	Any JDBC compliant: Oracle 10g-11g, DB2 9.x, SQL Server 2008-2014
Web and Application Server	JBoss 5.1
Web Browsers	Internet Explorer version 9, 10, 11 Chrome version from 35.0.1916 - 53.0.2785 Firefox versions from 32 - 48
Java Virtual Machine	SUN Java Runtime Environment (JRE) v8 or later
System RAM	6.0GB (MDM Server), 2.0GB (MDM Client)
Hard Disk Storage	100GB (MDM Server) - includes storage of OS, DBMS, JEE Application Server. Additional storage required for business data.
CPU	Intel Xeon 5 2.4GHz or higher; Any current RISC platform supporting Unix or Linux
Network Protocol	TCP/IP (MDM client and server), HTTPS and FTP (for external data synchronization)

innovit

"Innovit Multi-Domain Master Data Management delivers key business outcomes through trusted master data."

ABOUT INNOVIT

Innovit's globally certified product data management solutions protect revenue streams, reduce supply chain costs, improve online product marketing effectiveness and ensure regulatory compliance. Delivering the fastest time to value for a complete end-to-end solution with preconfigured modules that have out-of-the-box data validation, the broadest global coverage for data synchronization, and publication capabilities to support maximum syndication advantage for omni-channel ecommerce. Operating since 2000, Innovit is based in San Francisco CA with offices in London, Sydney and Melbourne and customers such as Johnson & Johnson, Kellogg's, 3M, Colgate Palmolive and B. Braun across diverse industries including healthcare, CPG and automotive aftermarket.
