

Innovit NPI Workflow

TECHNICAL DATA SHEET

Innovit NPI Workflow is a platform for managing processes that involve multiple steps and stakeholders such as New Product Development (NPD) and New Product Introduction (NPI). These processes are defined by activities that require collaboration between many people across different departments before the product goes into production. Innovit's NPI workflow management solution orchestrates the collection, validation and transfer of product data across multiple stakeholders to ensure each product is delivered to the customer in-full, on-time and on-spec.

Innovit NPI Workflow is an enterprise-wide software application developed using standards-based Java and Web Services technologies. The architecture is designed for distributed processing that allows master data to be managed and exchanged collaboratively, across both intranet environments and the Internet.

CAPABILITY AND SYSTEM REQUIREMENTS

Innovit NPI Workflow (v2.3) application offers platform independence across all major database, operating system, web & application server and browser platforms.

Operating System	Any operating system that supports Java, including: Windows (Vista, 7, 8.1, 10), Windows Server (2008R2 - 2012R2) - Server systems must be 64-bit Windows, RHEL Linux 5 or later (or equivalent), Solaris 10 or later.
Database Management System (DBMS)	Any JDBC compliant: Oracle 10g-11g, DB2 9.x, SQL Server 2008-2014
Web and Application Server	JBoss 5.1
Web Browsers	Internet Explorer version 9, 10, 11 Chrome version from 35.0.1916 - 53.0.2785 Firefox versions from 32 - 48
Java Virtual Machine	SUN Java Runtime Environment (JRE) v8 or later
System RAM	6.0GB (Workflow Server), 2.0GB (Workflow Client)
Hard Disk Storage	80GB (MDM Server) - includes storage of OS, DBMS, JEE Application Server. Additional storage required for business data.
CPU	Intel Xeon 5 2.4GHz or higher; Any current RISC platform supporting Unix or Linux
Network Protocol	TCP/IP (client and server), HTTPS and FTP (for external data synchronization)

"Innovit Workflow Management automates cross-division collaboration to launch products on-time."

ABOUT INNOVIT

Innovit's globally certified product data management solutions protect revenue streams, reduce supply chain costs, improve online product marketing effectiveness and ensure regulatory compliance. Delivering the fastest time to value for a complete end-to-end solution with preconfigured modules that have out-of-the-box data validation, the broadest global coverage for data synchronization, and publication capabilities to support maximum syndication advantage for omni-channel ecommerce. Operating since 2000, Innovit is based in San Francisco CA with offices in London, Sydney and Melbourne and customers such as Johnson & Johnson, Kellogg's, 3M, Colgate Palmolive and B. Braun across diverse industries including healthcare, CPG and automotive aftermarket.
